

**ALABAMA BOARD OF LICENSURE FOR
PROFESSIONAL ENGINEERS AND LAND SURVEYORS
MINUTES – JULY 20, 2021
Montgomery, Alabama**

The Alabama Board of Licensure for Professional Engineers and Land Surveyors was established by legislative action in 1935. Its charter is to protect the public by helping to safeguard life, health, and property, and to promote the public welfare by providing for the licensing and regulation of persons in the practices of engineering and land surveying. This purpose is achieved through the establishment of minimum qualifications for entry into the professions of engineering and land surveying, through the adoption of rules defining and delineating unlawful or unethical conduct, and through swift and effective discipline for those individuals or entities who violate the applicable laws or rules.

21-082. IT WAS MOVED by Mr. Johnson and seconded by Mr. Vaughn to accept the following language as a guideline for applicants with experience gained from remote supervision. MOTION CARRIED 9-0.

“While it cannot be disputed that the benefits of face-to-face mentoring and supervision of engineering or land surveyor interns cannot be overemphasized; it is also recognized that a certain degree of benefit can be realized through mentoring and supervision by using electronic communication platforms. With the need to conduct business not only in person, but virtual interaction with business clients becoming more acceptable and necessary in today’s business climate, the use of technological communication tools have become a necessity in modern business interactions. This is true not only for client interactions, but it is also essential for employee communication and training.

BELS will recognize remote supervision of engineers and land surveyors, but only on a case-by-case basis. Documented evidence must be provided to the board that clearly outlines the remote supervision methodology utilized to guide the engineering and/or land surveyor intern towards progressive knowledge and responsibility. An active formal training and supervision plan must be developed by a firm wishing to employ remote supervision techniques, that describes, in detail, the methodologies to be employed and the frequency of virtual contact between the engineering and/or land surveyor intern and the supervisor. Written records should be maintained by the consulting firm, which may be requested by BELS to verify intern supervision.”
